An electric thermostat thermostats for MAZDA

|                 |   |                |
|-----------------|---|----------------|
| Maker           | MAZDA   |                |
| Car model       | MAZDA3(BPEK#)/CX-30(DMFP#)  |                |
| Eng. type       | HF(SKYACTIV-X)  |                |
| Genuine #       | HF10-15170-A  |                |
| Parts #         | WH-MZA-97   |                |
| 4-digit code    | 4217  |                |
| EANcode #       | 4580281471806   |                |
| ITFcode #       | 34580281471807  | Quantity: 5pcs |
| Appearance form |  <p style="text-align: right;">With gasket</p> <p style="text-align: right;">LABEL</p> |                |
| Release         | Mar. 2024   |                |

Newer vehicles contain more complex engines with larger systems and parts, so when replacing your engine's coolant you must be cautious and use great care to remove any air in the cooling circuit as excess air could lead to your engine overheating.

《CVT valve (outline structure of thermo valve)》

The oil used in the CVT has been difficult to warm up. Therefore, the car was forced to run at a low temperature and high oil viscosity for a while after the engine was started. This was causing fuel consumption to deteriorate due to resistance. In order to raise the temperature of the CVT oil quickly and efficiently, to make it low viscosity, to reduce resistance, and to increase fuel efficiency, the CVT valve (thermo valve) has been installed. In order to raise the temperature of the CVT oil quickly and efficiently, to make it low viscosity, to reduce resistance, and to increase fuel efficiency, the CVT valve (thermo valve) has been installed. The CVT valve (thermo-valve) is designed to take advantage of the characteristic of the engine cooling water to raise the temperature relatively quickly. The heat of the coolant that has risen in temperature is exchanged with the CVT oil to quickly reduce the viscosity of the CVT oil, thereby reducing the load on the engine and improving fuel economy. This reduces the load on the engine and contributes to fuel economy.
